

Prof. Dr. Dominique Bergmann

Stanford University

will talk about

"Flexible leaf development in a changing world"

Date: Thursday, 03.07.2025, 13:00

Room: ND 5/99

Guests are very welcome!

We are happy to have Prof. Dominique Bergmann from Stanford University visiting us and giving a talk. Dominique is an internationally renowned scientist in developmental (plant) biology, celebrated for her groundbreaking research on cell division and differentiation in plants. Her work on stomatal development has revolutionised our understanding of fundamental plant processes and plant stem cells. You do not have to be a plant expert to be captivated by her science. All biologists are welcome!
